DETAILED ACTION

Election/Restrictions

1. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising Figure 1, Figure 6, and Figure 7. The Application also contains the following subspecies: Figure 2, Figure 3, Figure 4, and Figure 5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species together with a single subspecies and to list the claims that read on the elected species/subspecies combination, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Eric Cohen on 4/22/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3746

3. As a courtesy to Applicant, the Examiner notes that element 30 is taught in the disclosure to be a fan, and element 32 is disclosed to be a blade of said fan, however element 32 is not a part of element 30. Clarification and/or correction is suggested. It is also noted that fan 30 looks like any conventional turbine rotor in a gas turbine.

Applicant is queried as to why said "fan" would not read on any conventional turbine rotor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ehud Gartenberg whose telephone number is 571 272 4828. The examiner can normally be reached on Monday-Thursday.
